

Favor TechConsulting, LLC (FTC) is seeking a Java Developer to support Washington Headquarters Services (WHS) in software design, development, deployment, integration, and configuration support services. The Developer is responsible for conceiving, designing, and testing developed code and web services to meet program requirements, as well as documenting detailed design and architecture specifications as part of program design deliverables.

Essential Job Functions & Responsibilities

- Develop and maintain high-quality software products supporting Department of Defense (DoD) standards and infrastructure, using Microsoft SQL and integrated system components.
- Support and comply with documented software process and procedure requirements spanning all phases of software product lifecycle.
- Translate detailed designs into executable software.
- Design and deliver web service-driven Business Intelligence (BI) tool reports and analytics.
- Participate in meetings with team members and clients/stakeholders to design user-friendly interfaces; develop high-quality, object-oriented business objects; and conducting research and evaluation of software-related technologies and products.
- Produce software documentation and update existing documentation to include detailed software design documents and unit/composite test cases based upon stakeholder requirements and use cases.
- Collaborate with and mentor other team members, and assisting with code reviews.
- Manage tasks, time and priorities in accordance with aggressive development deadlines, client expectations, and quality/delivery models including Agile Scrum, SDLC, and CMMI Development Level 3 best practices.
- Collaborate with the team to proactively assess and validate solution efficiency and integrity against defined performance criteria.
- Perform unit and integration testing on work items in line with Scrum cycles.
- Work with Program Management and other team members to proactively assess and validate solution efficiency and integrity against defined performance criteria.

Required Minimum Qualifications

- DoD Secret Clearance
- 3-5+ years' experience in design, development, documentation and implementation of applications and reporting solutions based on agreed customer specifications.
- Masters or Bachelor's degree in Computer Science, Software/Systems Engineering, or equivalent technical degree.
- A deep understanding and working knowledge of Java 2 Platform Enterprise Edition (J2EE), JavaServer Pages (JSP), Java Servlets, Java classes, web application architecture (WAR), Web Service Definition Language (WSDL), Extensible Markup Language (XML), tag libraries, static web pages (HTML and related files) and other resources that together constitute a web application.
- Website development HTML, JavaScript, and CSS experience.
- Experience working with Windows Server 2008/2012 R2. Amazon Web Service (AWS) experience is a plus.

- Data management experience with Microsoft SQL Server 2012.
- Business and data access logic (server-side) knowledge.
- SQL Server database objects (including stored procedures).
- Automated and manual Unit Testing (JUnit).
- Must be familiar with Git code management or able to quickly acclimate to using this code repository. SVN knowledge will be considered.
- Expert experience in the design, manipulation and build of standards-compliant Web Services (SOAP & RESTful).
- Previous experience configuring and managing MS SQL Business Intelligence (SSRS/SSIS) Server applications or equivalent BI tools. Reports, analytics, and dashboard design experience in the latest version of MS SQL SSRS/SSIS is a plus, but experience with other BI products like JasperReports, Spotfire, Pentaho, Tableau will be considered.
- Experience using Oracle administration, use of Flashback Technology, and SQL Developer.

In addition, U.S Citizenship is required. Applicants selected will be subject to a government security investigation and must meet eligibility requirements for access to classified information and be able to obtain a government-granted security clearance. Individuals may also be subject to a background investigation to include but not limited to criminal history, employment and education verification, drug, testing, and creditworthiness.
